*Healing Your Traumatized Child* explains how children (from birth to age twelve) can recover from traumatic experiences with their own parents acting as guides through the healing process. From bee stings and broken bones to wildfires and school shootings, most children experience some type of trauma while growing up. Luckily, children are born with the ability to recover from trauma, but they need help in order to do so. With the information in this book, parents will learn to identify their children's symptoms of trauma and facilitate their children's innate healing mechanisms.

Beginning with background information about pioneers in childhood trauma and ending with two chapters of powerful and inspiring true case histories, this book clearly explains the impact of trauma on children as well as the basic principles of healing. Parents will gain many practical skills to help their children recover, including surprisingly simple play-based activities.

An additional benefit of this approach is that it helps solve behavior problems. Many of children's difficult behaviors are indications of unhealed trauma. Parents will learn to interpret the underlying reasons for these behaviors and find solutions without using punishments or rewards. The author also explains how children's developmental stages affect their reaction to traumatic events and which techniques are most effective at each age.

Based on studies in the neurobiology of trauma, cognitive neuroscience, child development, and psychotherapy, this is a well-researched book with over 100 scientific references. The charts scattered throughout the text provide handy summaries of major points. An additional feature is a useful glossary of terms.

## About the author

Dr. Aletha Solter is a Swiss/American developmental psychologist living in Southern California. She studied with Dr. Jean Piaget in Geneva, Switzerland, where she earned a Master's Degree in human biology. She holds a Ph.D. in psychology from the University of California. Her parenting books have been translated into many languages. Dr. Solter is the founder of the Aware Parenting Institute ([www.awareparenting.com](http://www.awareparenting.com)), and she is recognized internationally as an expert on attachment, trauma, and non-punitive discipline. She has led workshops for parents and professionals in 17 countries.
